## Volcanic Heartland

This trip includes one of the North Island's beach paradises, the Coromandel, with its Hot Water Beach and distinctive rock formations as well as the dramatic volcanic centre of the North Island that is Rotorua, Lake Taupo and Tongariro National Park. Both are regions where there are a plenitude of outdoor activities, hiking, biking, kayaking and rafting. However their volcanic landscapes are very different. In the Coromandel, White and Mayor Islands lie far out to sea, their activity a distant and occasional plume. In Rotorua sulphur is in the air and in the Tongariro National Park you get close to the active craters of Ngarahoe, Tongariro and Ruapehu.
